

ABSTRACT OF THE DISCLOSURE

The Abstract of the Disclosure is attached on a separate sheet at the end of this amendment.

ABSTRACT OF THE DISCLOSURE

An accessory for a hand drill. The drill has an output shaft and a cylindrical attachment surface. The accessory includes a roller with its two ends rotatably mounted in opposite legs of a fork-shaped unit. One leg includes a transmission which transmits power to the roller from the drill. The mounting part can be mounted on the surface of the drill and encloses an input shaft which couples with the output shaft of the drill and which is connected to the transmission.
